9.0 Read-only Feature

This feature provides a read-only shipping method which is validated as normal using the configured criteria. However, the method is not available to the user, instead a message is displayed as shown in this screenshot.

The screenshot shows a shipping method selection interface. At the top, a 'Message' box contains the text: 'Sorry, we are unable to deliver to your postcode. You are welcome to collect from our warehouse.' Below this is a progress bar with three steps: '1 Customer information' (active), '2 Checkout', and '3 End'. Underneath, the 'Customer information' section shows 'E-mail: test@test.com'. The 'Shipping address' section lists: 'Test Testing', 'Testing', 'ZZZZ Testing Quebec', and 'Telephone: 0123456789'. The 'Shipping method' section has a radio button selected for 'Pick up at our warehouse \$-1.80' and a 'See our location map' button.

The configuration to achieve this can be seen in this shipping method listing.

The name of the method (shown as *Message* in this example) is passed as the message type to the Joomla [enqueueMessage\(\)](#) function. See Joomla documentation for common examples.

However, if you prefer you, can use a language constant (such as `MY_NOSHIP_TITLE`) for the message type and then use language overrides to customise your text. The translated text for common Joomla message types is typically catered for by Joomla.

9.1 Scottish Islands, Highlands and Offshore Locations

This example illustrates how to use the *Read-Only* feature to provide free shipping to all UK locations except those offshore – including the Isle of Wight.

The screenshot shows the 'Shipping methods' management interface. At the top, there are buttons for 'Copy', 'Publish', 'Unpublish', 'New', 'Help', and 'Dashboard'. Below this is a navigation menu with 'System', 'Products', 'Customers', 'Orders', 'Display', and 'Documentation'. A search bar is present with a filter icon, a search icon, and a close icon. Below the search bar, there are two input fields: 'Enter postcode' and a dropdown menu for 'All plugins' with 'all' selected. The main content is a table with the following columns: '#', a checkbox, 'Name', 'Price', 'Restrictions', and 'Type'. The table contains two rows:

#	<input type="checkbox"/>	Name	Price	Restrictions	Type
1	<input type="checkbox"/>	Special Delivery Area		Readonly method (shows message) Ignore method if postcodes previously mat... Postcodes : AB3[1-8] AB4[0-9] AB5[0-6] ...	Hikashopshipping - Manual Shipping for Hikashop by BrainforgeUK
2	<input type="checkbox"/>	Free		Postcodes : \$ [A-Z]	Hikashopshipping - Manual Shipping for Hikashop by BrainforgeUK

Customers are unable to create an order for delivery to one of these postcodes.

AB3[1-8] AB4[0-9] AB5[0-6] BT GY IM IV[1-9] JE KA[1-26] KA[28-99] KW[1-9] PA[2-9] PH[4-9] PO[34][0-9] ZE

Typically the associated message will instruct the customer to contact to shop to arrange delivery.

The \$ [A-Z] postcodes specified will catch all addresses with or without a postcode. This can be useful if the cart is shown when the customer first enters checkout before login.

9.2 Avoiding Unnecessary No shipping method Messages

These messages can, confusingly, occur when the first checkout step is configured like this:

Step 1 Cart

Shipping

Read only: Yes No

Show title: Yes No

Multiple group product display: Yes No

Selector type: List Dropdown list

Price with tax: Inherit Yes No Both

Cart

Read only: Yes No

Show image: Yes No

Step 2 Login & Address

Login Address

Create a read-only shipping method

It must be the very last one in the list (120 in this example).

<input type="checkbox"/>	Free Shipping	Warehouse: Free Ignore method if quoted postcodes previous... Postcodes : \$	Hikashopshipping - Manual Shipping for Hikashop by BrainforgeUK	119		
<input type="checkbox"/>	Delivery Options	Readonly method (shows message) Ignore method if any postcodes previously ... Postcodes : \$ [A-Z]	Hikashopshipping - Manual Shipping for Hikashop by BrainforgeUK	120		

The \$ [A-Z] postcodes specified will catch all addresses with or without a postcode.

If customer has not previously added their address the checkout first step will appear like this:

1 Cart 2 Login & Address 3 Shipping & Payment
