

Manual Shipping Plugin for Hikashop by Brainforge.UK

2.0 Specific Configuration

Between the *Generic Configuration* block and the *Restrictions* block of the shipping method configuration screen there is a *Specific Configuration* block. The contents of this block varies according to which *Plugin Features* are selected.

With all features turned off then the *Specific Configuration* block appears like this:

The screenshot shows the configuration interface for the 'bfmanual' shipping plugin. The 'Main information' section includes a name field with the value 'BFManual Shipping Method Example' and a description editor containing the text: 'This is the simplest BFManual shipping method example - all features turned OFF! There are no specific configuration options available - as they are all turned OFF! Hikashop generic configuration options and restrictions are always available!'. The 'Generic configuration' section has several fields: 'Published' (Yes/No), 'Images' (empty), 'Price' (0.00000, currency: € GBP), 'Percentage' (0%), 'Automatic taxes' (Yes/No), 'Use price per product' (Yes/No), 'Include virtual products price' (Yes/No), 'Override shipping address' (No), and 'Override tax zone' (empty). The 'Specific configuration' section is empty with a 'Help' link. The 'Restrictions' section is checked and includes 'Zone' (empty), 'Currency' (Type or select s), 'Warehouse' (empty), and 'Minimum price' (n).

The configurable fields which can appear in the *Specific Configurable* block are described below.

Manual Shipping Plugin for Hikashop by Brainforge.UK

2.1 Order Times Option

This feature can be used to restrict a shipping method to certain order times.

I.E. order must be placed before, between or after specific times.

Specific configuration

| | |
|--------------|----------------|
| Order before | Not Applicable |
| Order after | Not Applicable |

2.2 Product Quantity Option

This feature can be used to limit the *total* number of products which can be included with a particular shipping method.

Specific configuration

| | |
|------------------|----------------------|
| Minimum quantity | <input type="text"/> |
| Maximum quantity | <input type="text"/> |

2.3 Available Between

This feature allows the availability of a shipping method to be restricted before, between or after specified date(s). This can be used to configure carrier price changes in advance.

Specific configuration

| | | |
|-------------------|----------------------|----------------------------------|
| Available between | 2016-03-28 15:00 | <input type="button" value="📅"/> |
| and | <input type="text"/> | <input type="button" value="📅"/> |

2.4 Delivery Slots

If an order custom field 'ORDER_DELIVERY_SLOT' is defined this feature may be used to restrict a shipping method to particular delivery slots (e.g. an overnight slot may be more expensive than day time slot). Enter the value(s) of the required slot(s) one per line. This feature is intended for use with the separate 'Hikashop Brainforge Delivery Slot' plugin. The 'ignored if' feature works in the same way as the similarly named postcode feature.

Specific configuration

| | |
|--|---|
| Ignore method if delivery slots previously matched | <input type="radio"/> Yes <input checked="" type="radio"/> No |
| Valid delivery slots | <input type="text"/> |

2.5 Postcode Prefix

Used to restrict shipping method to a particular postcode area, such as: *01*

Regular expressions can be used, such as: *0[1-4]*

Typically the *Valid Postcode Options* and *Postcode Prefix* features are not used together.

Specific configuration

| | |
|-----------------|----------------------|
| Postcode prefix | <input type="text"/> |
|-----------------|----------------------|

2.6 Country

Used to restrict shipping method to a particular country.

Note that this is not the same as the *Hikashop Zone Restriction*. The *Zone Restriction* is applied *before* any of the BManual method options are processed. In some cases this may not be the required behaviour.

Specific configuration

| | |
|-----------------|----------------------|
| Postcode prefix | <input type="text"/> |
| Country | Select an option |
